Thread

Special Dentelles 80. You will need 6 pairs in white and 11 short pairs and 1 longer pair (for the body worker) in red.

Method

Hang four white pairs open on pin **A**. Work the hat with cloth stitch and twist at the edges and half stitch in the middle.

Hang one of the short red pairs on pin **B**. This will be the worker for the hat. Then hang five red passives on a temporary pin nearby, laying them alternately with the white pairs. Work the hat in cloth stitch. Leave the hat workers to hang from pin **C**.

Hang another white pair on pin **D** and use it as worker for the face. Work the face in cloth stitch adding two very small beads for the eyes (see **EDL - Basic Techniques** for how to add beads).

Add one white pair at the right-hand side and lay all the white pairs to the back of the pillow to be used later for the beard.

Hang the long red workers on pin **E** and five more red pairs on pins across the row. Work the body in cloth stitch adding three black beads for buttons where indicated. Tie off all red pairs.

Bring down the white pairs and cloth stitch them together for the beard. Finish with knots.
